

Digital Media + Learning Conference

October 4-6, 2017 @ UC Irvine

Email: dmlhub@hri.uci.edu

Preparing Teachers for the Connected Learning Ecology Through Playful Practice Spaces

In this workshop, we invite educators and practitioners, from both formal and informal learning spaces, to re-envision teacher training for connected learning. During the workshop, we will first collectively identify/brainstorm practices/competencies (e.g., new digital literacy, interest-driven personalized learning) that are critical to support connected learning. And then, we will explore ways to redesign teacher preparation programs. Specifically, we will collaboratively design playful practice spaces (e.g., in-person games, hands-on activities) that will prepare pre-service teachers to develop connected learning lessons that blend formal and informal learning experiences and improve educational outcomes for all students. Participants will leave with both prototypes for teacher practices spaces for connected learning and a deeper understanding of the design process.

This workshop is open to everyone (not just teacher preparation faculty). Join us for a fun, interactive, design-based session in which you will help create an educational tool that will shape the future of teacher education!
